PRECISION MAPPING & ANALYSIS

SATLOC MAPSTAR

VIEW, ANALYZE, AND EXPORT DATA WITH MAPSTAR 9

MAPSTAR 9 is an advanced pre-application mapping and post-application analysis log replay software, now featuring seamless Satloc Cloud integration for pushing and pulling logs and jobs. It supports popular GIS file formats such as CAD DXF, MapInfo MID/MIF, Esri® Shapefiles (SHP), PMH, PMD, and KML ensuring easy import/export functionality.

Save time by pre-planning routes, uploading GIS maps, or manually entering GIS coordinates. Perform comprehensive post-application analysis, including spray and flight path data. The software now automatically integrates Transland Electric Gate & Meterate data for more streamlined reporting.

MapStar 9's Satloc Cloud integration feature is a significant time-saver for users who don't rely on third-party services frequently. For those who need an organized log file structure MapStar® 9 offers the ideal solution.

FLEXIBLE SOLUTIONS FOR AERIAL APPLICATORS   **WWW.SATLOC.COM**

SATLOC MAPSTAR

NOW WITH SEAMLESS SATLOC CLOUD INTEGRATION

FEATURES

SATLOC CLOUD INTEGRATION
Push/pull logs & jobs to/from Satloc Cloud, with Satloc Falcon, Bantam 2, & G4.

COMPANY FLEET MANAGEMENT
Manage multiple aircraft with Satloc Cloud using MapStar's group feature for a seamless data management experience.

AS APPLIED DATA PAGE
A straightforward page displaying real-time application data, valuable for all users, especially those in international settings.

INTEGRATED DATA
Automatically log connected Transland Electric Gate & Meterate data during flights, with no need for manual selection.

IMPORT/EXPORT GIS FILES
Easily work with SHP, DXF, MID/MIF, KML, PMH, PMD and custom ASCII file formats.

PRE-PLAN SPRAY JOBS
Upload GIS maps or manually enter GIS coordinates to save time and money before flights.

CREATE OR EDIT
waypoints, field boundaries, and patterns. Customizable mapping capabilities for accurate planning.

VIEW AREA
sprayed, chemical amounts applied, and latitude/longitude positions.

MEASURE DISTANCE AND AREA
Powerful analysis tools for precise reporting.

VIEW AND PRINT LOG FILES
Analyze data in the field or at the office for post-application review.
