## TRACKING

The Satloc Cloud is a web-based tracking tool that allows users to view the location of one or multiple aircraft in real time.

- ✓ View real time flight tracks and spray tracks.
- ✓ Visualize job polygons assigned to aircraft on the Cloud map.
- ✓ Optional mapping interface with background terrain or non-terrain maps.

## WIRELESS DATA TRANSFER

The Satloc Cloud gives the ability to quickly transfer data to and from aircraft automatically, without pilot interaction. Falcon, Falcon Pro, G4, and Bantam 2 automatically receive job files needed to move quickly to the next job while still in the air, saving time and fuel. Application logs are automatically sent to the Cloud, harmonizing aircraft and billing operations. Direct data connection is available to transfer jobs and logs to/from 3<sup>rd</sup> party billing and management companies.

- ✓ Automatically send/receive: Job files, PMAPS, Shape Files, and Log files. No pilot interaction required for transfer.
- ✓ Job and Log files are automatically transferred when connected to internet. If no connection available at the time job is completed, then the file will transfer automatically once there is an available network. *A robust internet connection is recommended for maximum speed and reliability.*
- ✓ 3<sup>rd</sup> party software support with:    

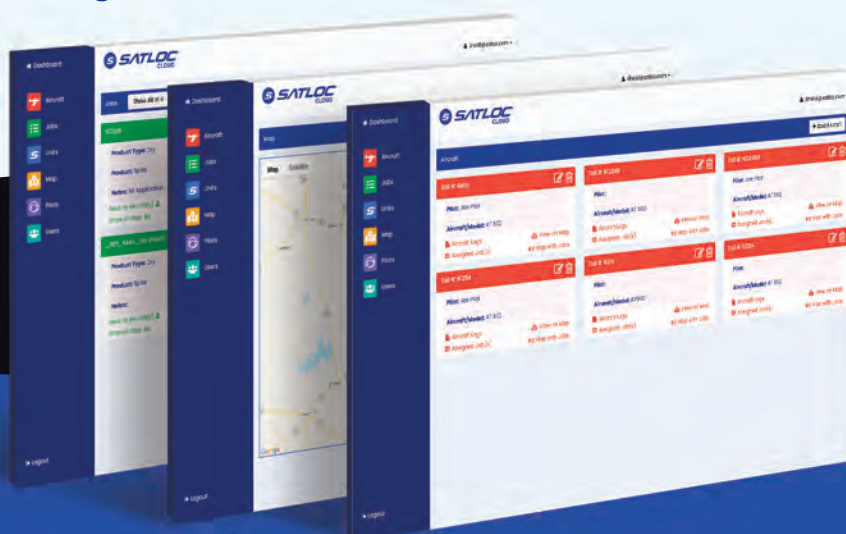

## STREAMLINE YOUR WORKFLOW WITH MAPSTAR 9

Integrate MapStar 9 with Satloc Cloud —Get Connected. Stay Ahead.

MapStar 9 with Satloc Cloud, users gain fast, wireless file transfers, eliminating the need for USB drives or manual handling. Job files and flight logs can be pushed or pulled instantly, streamlining both pre-application planning and post-flight analysis. Operators can manage multiple aircraft and systems from a single dashboard, with centralized access to jobs, logs, and updates —No third-party cloud services required. Unlock full fleet management features today!

- ✓ Create jobs in MapStar 9 and send them straight to the cockpit. Perfect for coordinating multiple pilots or aircraft, all from your office.
- ✓ Pull spray logs and flight paths into MapStar 9 for immediate analysis and reporting. No more waiting on ground crews or file transfers.
